The Greene Scale is a really useful tool to collate your particular menopause symptoms in advance of meeting with your GP. It ensures you have a list to hand of all symptoms you are experiencing to maximise your appointment time with your doctor.

The Greene Scale provides a brief measure of menopause symptoms. It can be used to assess changes in different symptoms, before and after menopause treatment. Three main areas are measured: 1. Psychological (items 1-11). 2. Physical (items 12-18). 3. Vasomotor (items 19, 20). Please indicate the extent to which you are bothered at the moment by any of these symptoms by placing a tick in the appropriate box.

SYMPTOMS	Not at all 0	A little 1	Quite a bit 2	Extremely 3	
1. Heart beating quickly or strongly					
2. Feeling tense or nervous
